

**Congress of the United States**  
**House of Representatives**  
**Washington, DC 20515-4402**

*Dear Chairman Graves and Ranking Member Larsen:*

*I am requesting funding for Centerville Water Quality & Drought Resiliency Project in the Water Resources Development Act of 2026.*

- *The project sponsor for this project is City of Centerville, and the project is located at 250 North Main Centerville, Utah 84014-1824.*
- *The project is located in UT-02.*
- *The purpose of this project is to upgrade the city's 1930s-era water infrastructure by replacing a failed well, expanding transmission lines, implementing aquifer storage and recovery systems, and improving hillside drainage to protect water quality.*
- *The project is an appropriate use of taxpayer dollars and is anticipated to have the following benefits.*
  - *Ensures reliable, high-quality drinking water for 17,000 residents during ongoing drought conditions while providing enhanced fire protection, emergency access, and support for continued economic development. It also improves water flow to the Great Salt Lake and replaces failing 1930s-era infrastructure before catastrophic failure, saving taxpayers from costly emergency repairs.*

*I certify that neither I nor my immediate family has any financial interest in this/these project[s].*

*Sincerely,*

*Rep. Celeste Maloy (UT-02)*  
*2/6/2026*
